In the United States Patent and Trademark Office

Application/CN: 10/604,360   July 19, 2009
Application Filed: 14 July 2003
Applicant: Spero, Yechezkal Evan   5
Title: Multiple Light-Source Illuminating System
Examiner: Bao Q. Truong
Art Unit: 2875

Correction to Reply to Final Office Action dated April 17, '09   10
Amendment F & Remarks

Commissioner for Patents
Washington DC

Sir:

The document sent on Friday was an incorrect version of the reply and did not have a   15
complete list of claims. I am hereby sending the correct version.

Elections/Restrictions

In reply to point 1 of the "Detailed Action"— *Newly Submitted claims 57, 58 and 67*
directed to an invention independent form the invention originally claimed....

The examiner submits that "claims 57, 58 and 67 describing a lighting fixture capable of   20
using a multiplicity of LED light sources to provide uniform illumination over surfaces
within a living space whether the surface is directly below the illuminating device or off
in a distant corner is an independent invention from the invention originally claimed."
The original claim 1 read: "An illuminating device providing controlled illumination comprising: a)
a plurality of independent light sources... and claim 2 The illuminating device of claim 1 is an application   25
oriented luminaire designed according to correct lighting practice, providing said controlled illumination in
the correct light intensity, spectrum, and spatial distribution of intensity and spectrum, suited to the specific
lighting application, comprising a plurality of individual light sources capable, in combination, of providing
the correct intensity, spectrum, and spatial distribution of intensity and spectrum." In claims 57, 58 and
67 the applicant has presented "narrow" claims, sub-cases of the original claim, and thus   30
is not presenting a distinct invention. The applicant submits that claims 57, 58 and 67 are
clearly represented in the system block diagram shown in Fig 1, and in Fig 2B & 2C. As
per the description of Fig 1 in paragraph 0097 where the block diagram description of
